AI-driven tech consulting

Instructions

Best practices for Google Slides presentations

- Starting a new presentation:
 - Begin with a fresh slide deck by selecting the Devoteam slide deck from the top options at <https://slides.google.com/>.
 - If needed, you can add specific slides from this presentation deck to your new presentation.
- Making changes:
 - You cannot make changes to this slide deck directly; make a copy first.
- Using previous content:
 - When importing slides from previous presentations, select **"Import slides"** and then choose **"Match styles in this presentation."**
 - Ensure that you adapt previous content to the new look and feel of the current presentation theme.
- Managing slide themes:
 - If adding content from previous slides, delete old slide themes to avoid multiple themes being applied. Check this by going to **View > Theme Builder**. This helps reducing the overall file size.
- Images and file size:
 - Avoid adding too many images as they significantly increase the file size. This is crucial if you plan to download the presentation.
- PowerPoint usage:
 - If you plan to use the presentation in PowerPoint, use the [PowerPoint template available in our branding zone](#) instead of downloading the Google Slides template in PowerPoint format.
- Brand consistency:
 - Always use our font (**Montserrat**) and brand colours. Refer to our [brand guidelines](#) if in doubt.
 - Avoid using too many circles or shapes that might clutter the presentation.
 - There's no need to add the Devoteam logo on every slide. It's already on the opening and closing slides. Avoid placing the Devoteam hallmark on footers, prioritise the full logo.
- Presentation structure:
 - Always start your presentations with the Devoteam logo and tagline on slide 1, followed by the title slide.

Colours

Primary

Red poppy
#f8485e

Dark grey
#3c3c3a

White
#ffffff

All text, including text within graphics, should be formatted in Montserrat font and primarily in **dark grey**. **Avoid using black for text.**

Red poppy can be used to highlight some of the text.

Use **white** text only on dark image backgrounds.

Secondary

Poppy light
#fca2ae

Poppy lighter
#fddade

Aqua
#d7ebe7

Beige
#efeadc

Light grey
#efeeee

Secondary colours are intended for backgrounds and shapes.

Do not use secondary colours for text.

Accent

Intense fire
#fcc354

Fresh mint
#5ab891

Blue lagoon
#4a8cca

Candy
#ec86a3

Violet
#63238c

Accent colours are primarily for use in charts and for tagging different items in legends.

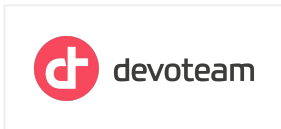

Do not use accent colours for text.

Frequently used assets

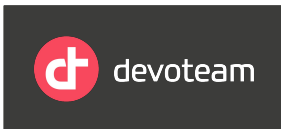

Devoteam logos, partner badges, success stories assets, and direct links to our libraries (icons, images) and brand guidelines.

Logos, badges and other assets

Devoteam logo

Primary logo
For white and light backgrounds

Logo with white wordmark
For dark backgrounds and images

White logo
To be used over dark backgrounds and images where the red poppy doesn't stand out

CV template

Two versions of the template are provided:

1. **With Devoteam logo:** Use this version primarily when the CV is shared independently.
2. **Without Devoteam logo:** Use this version when including the CV within a presentation.

Success stories

Use the following slides for success stories.
Find a selection of assets to complete them
(flags, sector icons, partner logos) [here](#).

Customer Reference Title

CHALLENGE

*Description of the initial issue, or **problem** that the customer wanted to address. Please mention any 'old' solutions where possible.*

Objective: What was the **goal**, the **desired situation** for the customer?

[Read more online](#)

SOLUTION

- “**Why**” (what set these events in motion) in the story?
- What **specific tools or solutions** were used?
- What **didn't have to change**?
- How did the **Partner Product/Partner Solution** team help the total solution remain flexible and appropriate for the customer?
- What were some of the **early indicators of success**?

RESULT

What was the **result of the implementation of the solution**?

What were the **visible consequences after the solution implementation**?

Did they **increase speed**? **Enhance efficiency**? **Saved costs**? **Reduced downtime**?

Provide **quantifiable results**. **Include numbers** where possible, this is very important.
