

PRO-NET – REQUEST FOR PROPOSAL (RFP)

Project Title: Customer Complaint Management System Implementation

RFP Reference: RFP 2026_028

Issue Date: 5/08/2026

Questions Deadline: 10/08/2026

Submission Deadline: 14/08/2026

1.0 EXECUTIVE SUMMARY

As PROTON e.MAS grows, customer communication channels are becoming more varied, and expectations for faster and better service are increasing.

This project aims to build a smart and centralized complaint management system that will overcome current system have limitation in terms of integration, dashboard & lack of major function through implementation of a secure, automated, and centralized CCMS to capture, track, escalate, investigate, and resolve customer grievances while meeting strict regulatory reporting guidelines.

- Combine all customer channels into one easy-to-manage platform
- Automatically assign complaints to the right person
- Provide quick access to helpful information for faster responses
- Track and monitor the complaint process in real time
- The goal is to improve customer satisfaction and enhance the brand's service image

Disclaimer:

- PRO-NET reserves the right to modify, cancel, or reissue the RFP at any point.
- PRO-NET is not liable for any costs incurred by the vendor in preparing their bid.

2.0 SCOPE OF WORK & DELIVERABLES

Module	Scope & Key Deliverables	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
2.1 Supply & Licensing			
2.1.1 Software Provisioning	Deliver all production and non-production licenses, cloud infrastructure environments, or on-premises installation packages, including liaison with third party suppliers on product and services offered as part of the overall proposed solution.	[Insert Compliance Status]	[Insert System Solution Details]

Module	Scope & Key Deliverables	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
2.1.2 Omnichannel Intake Setup	Supply the software components required to ingest complaints seamlessly from WhatsApp (text chat and voice chat, attachments), email, telephony integration (IVR), FB Messenger and Instagram messenger. There shall be no limit to the attachment size and file format.	[Insert Compliance Status]	[Insert System Solution Details]
2.1.3 Workflow Engine	Provide a configurable workflow engine capable of automating escalation matrices, risk scoring, and target resolution timelines.	[Insert Compliance Status]	[Insert System Solution Details]
2.2 Configuration & Testing			
2.2.1 Categorization & Rules Setup	Configure multi-tier case categorization. Refer to Appendix A. The list will be expanded from time to time and system shall allow addition or changes to the categories.	[Insert Compliance Status]	[Insert System Solution Details]
2.2.2 Integration Testing	Test real-time APIs connecting the CCMS to customer databases, and enterprise email networks. Including integration with: • Dealer Management System (DMS) • Vehicle Telematics System (TSP) • Power BI or other analytic tools	[Insert Compliance Status]	[Insert System Solution Details]
2.2.3 Executive Dashboard Setup	Real-time statistics on operational data and key reports		

Module	Scope & Key Deliverables	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
2.2.4 AI Speech-to-Text, Automated Responses and Resolution & FAQ Match Calibration	Calibration of speech to text transcription and AI responses on language adaptation, sentiment/emotion factor and KB completeness and accuracy, and accuracy of conversation summary	[Insert Compliance Status]	[Insert System Solution Details]
2.2.5 Regulatory Compliance Verification	Validate data masking (PII protection), secure audit logs (tamper-proof histories), and automated regulatory report formats.	[Insert Compliance Status]	[Insert System Solution Details]
2.2.6 System Integration Testing (SIT) / Quality Assurance (QA)	Provide the SIT/QA test report on a pre-agreed test script prior to handover to users for UAT.	[Insert Compliance Status]	[Insert System Solution Details]
2.2.7 User Acceptance Testing (UAT)	Provide environment support while customer service teams execute real-world testing scenarios in a sandbox environment.	[Insert Compliance Status]	[Insert System Solution Details]
2.3 Commissioning & Handover			
2.3.1 Setup & Core Deployment Services / Production Deployment	Execute final code, rule, and workflow configuration deployments into the live production environment.	[Insert Compliance Status]	[Insert System Solution Details]
2.3.2 Historical Data Migration	Execute the historical data migration including assessment and planning, data preparation (data cleansing, mapping and transformation) and the final data sync and cutover of open legacy complaints into the new system with zero data loss.	[Insert Compliance Status]	[Insert System Solution Details]

Module	Scope & Key Deliverables	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
2.3.3 System Product & Role-Based Training	Deliver on-site specialized training sessions and manuals for system administrators, supervisors and frontline customer service agents.	[Insert Compliance Status]	[Insert System Solution Details]
2.3.4 Documentation Handover	Deliver finalized architecture maps, functional configuration documents, API schema charts, user operation and training manuals.	[Insert Compliance Status]	[Insert System Solution Details]
2.4 Support & Maintenance			
2.4.1 Hypercare Support	Provide dedicated engineering response teams for 30 days immediately following live deployment.	[Insert Compliance Status]	[Insert System Solution Details]
2.4.2 Post-Production Warranty Support	Provide warranty support for 180 days following live deployment to resolve system bugs, and system refinement requiring reconfiguration, such as agent prompt and KB optimization, as and when necessary.	[Insert Compliance Status]	[Insert System Solution Details]
2.4.3 SLA Support	Offer tiered technical troubleshooting support with strict response times for critical issues.	[Insert Compliance Status]	[Insert System Solution Details]
2.4.4 System Updates	Ensure regular, free platform updates to maintain software security, performance optimization, and compatibility with updated web browsers.	[Insert Compliance Status]	[Insert System Solution Details]

Module	Scope & Key Deliverables	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
2.4.5 System Backup and Disaster Recovery Plan	Provide a mechanism to secure critical data and system restoration to safeguard business continuity.	[Insert Compliance Status]	[Insert System Solution Details]

3.0 SOLUTION OVERVIEW & SYSTEM FEATURES

Please indicate compliance status (Fully Out-of-the-Box, Customization Required, or Third-Party Add-on)

Note: Requirements on management of inbound to be in conjunction with Appendix B.

Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
3.1 Integration of Inbound & Agent Management			
3.1.1 Omni-Channel Single View	Unifies Call, Email, WhatsApp, and Social Media into a single agent desktop interface with pop-up system alert notifications. Agent interactions with callers should all be carried out within the same single agent desktop interface.	[Insert Compliance Status]	[Insert System Solution Details]
3.1.2 Voice Recognition	Automatic Speech-to-Text conversion for inbound voice calls in real time.	[Insert Compliance Status]	[Insert System Solution Details]
3.1.3 After-Hours Case Monitoring	The system should support business hour configuration and automatically identify whether incoming cases are received during or outside	[Insert Compliance Status]	[Insert System Solution Details]

Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
	operating hours for SLA tracking and reporting purposes.		
3.1.4 After-Hours Auto Response Management	The system should support automated out-of-office messages for customer enquiries received outside working hours across multiple channels, including email, calls, WhatsApp, and social media.	[Insert Compliance Status]	[Insert System Solution Details]
3.1.5 After-Hours Auto Response Management	The system should provide AI chatbot capability to handle customer enquiries 24/7 and escalate complex cases to human agents when required	[Insert Compliance Status]	[Insert System Solution Details]
3.1.6 Duty & Priority Polling	Validates agent on-duty status and respects agent channel priority settings (e.g., WA vs. Call priority), automatically polling tasks based on status (Available, Busy, etc). Refer to Appendix B.	[Insert Compliance Status]	[Insert System Solution Details]
3.1.7 Alert System	Multi-channel task reminders including desktop notifications, in-system alerts, and audible sound warnings.	[Insert Compliance Status]	[Insert System Solution Details]
3.2 AI FAQ Template & Automated Escalation Engine			
3.2.1 Real-Time AI FAQ Matching	Contextually detects keywords in live chats to prompt relevant FAQ responses, allowing single-click usage and quality scoring.	[Insert Compliance Status]	[Insert System Solution Details]

Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
3.2.2 Rules-Based SOP Routing	Automatically identifies Person-In-Charge (PIC), sends CC emails with rich attachments (photos, videos, web links), and triggers WhatsApp alerts.	[Insert Compliance Status]	[Insert System Solution Details]
3.2.3 Rules-Based SOP Routing	Supports email grouping by predefined teams. For example, selecting "Aftersales Team" will automatically include all relevant parties, eliminating the need for manual recipient selection.	[Insert Compliance Status]	[Insert System Solution Details]
3.2.4 Automated SLA Escalation: For Emails to dealers	• A 2-hour SLA trigger from the date and time the case is escalated to the designated recipient group. If no acknowledgement or first response is received within the 2-hour SLA, the system shall automatically flag the case as overdue and send a reminder or escalation notification to the relevant recipient and manager. • An 8-hour automatic escalation to the relevant higher-level manager if no further action or update is recorded. • A 48-hour unresolved-case alert for cases that remain open without a resolution or agreed action plan. Refer to Appendix B.	[Insert Compliance Status]	[Insert System Solution Details]
3.2.5 AI Activity Monitor	The system shall have a Master view/UI of all AI-handled conversations for administrator to monitor in real time.	[Insert Compliance Status]	[Insert System Solution Details]
3.2.6 System Audit Trail	The system shall maintain a complete audit trail of all notifications, acknowledgements, escalations,	[Insert Compliance Status]	[Insert System

Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
	and updates, including the agent or recipient name, date and time, SLA status, and remarks.		Solution Details]
3.3 Customer 360 View & DMS/TSP Integration			
3.3.1 Bi-Directional API Integration	Real-time asynchronous data sync (< 3 seconds) with Dealer Management System (DMS) and Vehicle Telematics System (TSP).	[Insert Compliance Status]	[Insert System Solution Details]
3.3.2 Automated Pop-Up Card	Instantly displays Personal Info, Vehicle Details, Service, and Complete Interaction History across all channels upon incoming contact, including the following: • Caller Name • Mobile Number • Insured Name/Vehicle Owner's Name • Vehicle Registration No.	[Insert Compliance Status]	[Insert System Solution Details]

-- the remaining of page is intentionally left blank --

4.0 SYSTEM REQUIREMENTS SPECIFICATION (SRS) & COMPLIANCE MATRIX

Please indicate compliance status (Fully Out-of-the-Box, Customization Required, or Third-Party Add-on)

Note:

1. Requirements on management of inbound to be read in conjunction with Appendix B.
2. Requirements on reports to be read in conjunction with Appendix C.

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.1	Integration of Inbound	All channels via Call, Email, WA or Social Media must be automatically integrated on the same agent interface & displayed in a single CRM view	[Insert Compliance Status]	[Insert System Solution Details]
4.2	Integration of Inbound	All new inbound will have a pop up notification (system alert)	[Insert Compliance Status]	[Insert System Solution Details]
4.3	Integration of Inbound	The system should support AI-powered translation for customer enquiries and agent responses across multiple languages. - English - Bahasa Malaysia - Chinese - Tamil	[Insert Compliance Status]	[Insert System Solution Details]
4.4	Integration of Inbound	The AI should support natural language understanding (NLU) and recognise variations in customer input, including spelling variations, abbreviations, and colloquial terms used in daily conversations. Example: <i>brp lama siap? nk service</i>	[Insert Compliance Status]	[Insert System Solution Details]
4.5.1	Integration of Inbound	When received Call, system will have a voice recognition & change to text . Transcription shall be in the actual	[Insert Compliance Status]	[Insert System

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
		conversed language, in real time on the agent screen.		Solution Details]
4.5.2	Integration of Inbound	When received Call, system will have a mechanism for routing/forwarding the call to either Live agent or RSA for roadside assistance related requests.	[Insert Compliance Status]	[Insert System Solution Details]
4.6	Integration of Inbound	Agent is able to transfer a voice call to another agent, have a mute button, hold line function (with prerecorded media)	[Insert Compliance Status]	[Insert System Solution Details]
4.7	Call Recording Retrieval	The system should allow users to retrieve, and playback call recordings for customer interactions.	[Insert Compliance Status]	[Insert System Solution Details]
4.8	Inbound	At the end of a WA conversation, customer can rate the AI and/or Live agent (CSAT Survey) performance	[Insert Compliance Status]	[Insert System Solution Details]
4.9	Inbound: NPS rating system	At the end of a voice call, the system provides agent the option to transfer/route the call to a rating system for customer feedback.	[Insert Compliance Status]	[Insert System Solution Details]
4.10	Agent Management	On-duty check, channel priority settings, and automatic polling task assignment based on status.	[Insert Compliance Status]	[Insert System Solution Details]
4.11	Agent Management	The system shall be able to check who is on duty before escalate to agent	[Insert Compliance Status]	[Insert System

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
				Solution Details]
4.12	Agent Management: Agent Availability Monitoring & Notification	The system should monitor agent availability status (e.g., Available, Busy, Break, Toilet, Follow-up) and trigger notifications based on predefined time thresholds.	[Insert Compliance Status]	[Insert System Solution Details]
4.13	Agent Management: Agent Status Alert:	The system should send notifications to both the agent and administrator role when an agent remains unavailable for more than 10 minutes. This allows the team leader to check and understand the reason for the prolonged unavailable status.	[Insert Compliance Status]	[Insert System Solution Details]
4.14	Agent Management: Extended Unavailability Alert:	The system should notify the administrator role when an agent remains unavailable for more than 1 hour, allowing the team leader to review any pending work-in-progress (WIP) cases assigned to the agent and ensure timely follow-up.	[Insert Compliance Status]	[Insert System Solution Details]
4.15	Agent Management	The system must support setting channel priorities for each agent (for example, WhatsApp priority, Email priority, Call priority etc.).	[Insert Compliance Status]	[Insert System Solution Details]
4.16	Agent Management	Automatic polling task assignment can be performed based on the current agent status (Available, busy, etc).	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.17	Agent Management	If all agents in the priority channel are busy, the system can intelligently switch and assign tasks to available agents. • Available • Busy (On Call) • Lunch • Break • Coaching • Training • Toilet • Prayer	[Insert Compliance Status]	[Insert System Solution Details]
4.18	Agent Management	All support tickets can be configured with a follow up reminder date. On expiry of the follow up date, a "Reminder" is sent to Agent. and "Timeout Warning" is popped up if the follow up is not completed within 1 hour. Reminder and Warning should support sound reminders, desktop reminders, and in-system notifications	[Insert Compliance Status]	[Insert System Solution Details]
4.19	AI FAQ Base	Real-time FAQ updates, keyword-based pop-up suggestions during chat, 1-click apply & quality scoring.	[Insert Compliance Status]	[Insert System Solution Details]
4.20	AI Image & Video Understanding Capability	The AI should be able to analyse customer-shared images and videos to identify potential issues, understand the reported problem, and recommend relevant follow-up questions or troubleshooting steps.	[Insert Compliance Status]	[Insert System Solution Details]
4.21	FAQ template with AI support	The system needs to integrate the FAQ knowledge base module to support the CRM team to update the FAQ content in real time.	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.22	FAQ template with AI support	During the conversation between the agent and the customer, the system can automatically match relevant FAQ entries based on chat keywords , and prompt real-time pop-up prompts to suggest related potential replies.	[Insert Compliance Status]	[Insert System Solution Details]
4.23	AI Suggested Reply / Agent Assist-	The system should provide AI-generated response suggestions to agents based on customer enquiries, knowledge base content, and previous resolved cases.	[Insert Compliance Status]	[Insert System Solution Details]
4.24	AI Sentiment Analysis	The system should analyse customer sentiment and identify customer emotions (e.g., satisfied, neutral, dissatisfied, urgent) during interactions, and adjust the conversation tone accordingly.	[Insert Compliance Status]	[Insert System Solution Details]
4.25	AI-Powered Duplicate Case Detection & Merging	The AI should analyse customer enquiries, identify duplicate or related cases, and automatically consolidate them to prevent multiple tickets being created for the same issue. • Link cases based on mobile number, email, vehicle registration number, or chassis number • Notify assigned PIC/agent when cases are merged • Avoid duplicate follow-up by multiple teams	[Insert Compliance Status]	[Insert System Solution Details]
4.26	AI Call Handling	Supports customer inquiries and responses in multiple languages.	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.27	AI Call Handling	Automatically summarizes customer conversations and case history at the end of a conversation.	[Insert Compliance Status]	[Insert System Solution Details]
4.28	FAQ template with AI support	The agent can refer to the FAQ content with one click and can also provide feedback and score the FAQ quality	[Insert Compliance Status]	[Insert System Solution Details]
4.28.2	AI Cost/Pricing Model	Detail how AI usage is metered and charged. e.g. based on API calls, resolution, token volume based on call/conversation length, conversation payload, etc.	[Insert Compliance Status]	[Insert System Solution Details]
4.29	Rule Engine & SOP	Rule-based routing to PIC, email notifications with attachments, and optional WhatsApp alerts.	[Insert Compliance Status]	[Insert System Solution Details]
4.30	Escalation Process: Email escalation	The system needs to support the rule engine, according to the classification / categorization of customer problems (department/business area) combined with SOP, to automatically:	[Insert Compliance Status]	[Insert System Solution Details]
4.31	Escalation Process	Identify Person In Charge (PIC) based on information solicited from caller/customer e.g. dealers, vehicle number, etc.	[Insert Compliance Status]	[Insert System Solution Details]
4.32	Escalation Process	Automatically notify and CC the relevant personnel by email (can support attachments if need, like photos, videos, web link and etc.)	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.33	Escalation Process	Trigger a WhatsApp message to alert the PIC (Optional)	[Insert Compliance Status]	[Insert System Solution Details]
4.34	Escalation Process	Automatic escalation mechanisms can be configured: 2-hour Automated Trigger: If no response or acknowledgement is received from the 1st escalation. 8-hours: If no respond received, the system shall automatically escalate the case to the designated higher-level manager.	[Insert Compliance Status]	[Insert System Solution Details]
4.35	Escalation Process	Escalated cases must have the following statuses and operations:		
4.36	Escalation Process	Escalate triggers an automatic reminder of the higher-level responsible person.	[Insert Compliance Status]	[Insert System Solution Details]
4.37	Escalation Process	Records of WIP and Resolved operations	[Insert Compliance Status]	[Insert System Solution Details]
4.38	Escalation Process	All status changes need to record information such as Agent name, time, and remarks	[Insert Compliance Status]	[Insert System Solution Details]
4.39	Email Delivery Status	System should prompt with alert notification if the email sending has failed, or the recipient email address is invalid.	[Insert Compliance Status]	[Insert System

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
				Solution Details]
4.40	Email Recall Function	System should provide option to recall email which was already sent out.	[Insert Compliance Status]	[Insert System Solution Details]
4.41		Trigger conditions:		
4.42	Customer Profile	Customer contact system by phone or WhatsApp (based on caller number or WA number)	[Insert Compliance Status]	[Insert System Solution Details]
4.43	Customer Profile	The system calls the DMS and TSP systems through API interfaces to automatically match and pull relevant information, not limited to: • Customer Information • Vehicle Information • Service History • Call Center History (All Call history, WA communication history, emails & any social media reply or Road Side Assistance)	[Insert Compliance Status]	[Insert System Solution Details]
4.44	Customer 360 View	Auto pop-up card with Personal Info, Vehicle Info, Service History, and Call Center History.	[Insert Compliance Status]	[Insert System Solution Details]
4.45	Customer Profile	After a customer calls, the Agent page automatically pops up the Customer 360 View Card	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.46	Customer Profile	The content of the card is divided into personal information, vehicle information, service information, and Call Center history	[Insert Compliance Status]	[Insert System Solution Details]
4.47	Customer Profile	All data synchronization should take no more than 3 seconds and support asynchronous loading	[Insert Compliance Status]	[Insert System Solution Details]
4.48	Reporting	The system shall have built-in reports or provision integration to Power BI (or equivalent BI tools) to implement the following data visualization reports:		
4.49	Reporting	Channel source analysis by case (Call/WA/Email or Social Media). Refer to sample report.	[Insert Compliance Status]	[Insert System Solution Details]
4.50	Reporting	By case division (Apps, Sales, Product Aftersales, Charging). Refer to sample report.	[Insert Compliance Status]	[Insert System Solution Details]
4.51	Reporting	Daily/weekly/monthly trend chart. Refer to sample report.	[Insert Compliance Status]	[Insert System Solution Details]
4.52	Reports	After-hours case volume report	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.53	Reports	Response time measurement based on business hours vs non-business hours	[Insert Compliance Status]	[Insert System Solution Details]
4.54	Reports	SLA calculation that considers operating hours	[Insert Compliance Status]	[Insert System Solution Details]
4.55	Power BI Analytics	Power BI integration for channel source, division, trend, PIC, reopening rate (CRR), and SLA stats.	[Insert Compliance Status]	[Insert System Solution Details]
4.56	AI Performance & Effectiveness Reporting	1. AI Case Resolution Report – Track the number of cases resolved by AI without human intervention. 2. AI vs Human Handling Report – Compare the volume of cases handled by AI versus human agents. 3. AI Response Satisfaction Report – Measure customer satisfaction ratings and feedback on AI-generated responses. 4. AI Escalation Report – Track cases where AI escalates to human agents and the reasons for escalation. 5. AI Accuracy & Improvement Report – Monitor AI response accuracy and identify areas for knowledge base improvement.	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
		6. AI Deflection Rate – The system should report the percentage of customer enquiries successfully handled by AI without requiring human agent intervention. 7. AI Root Cause Analysis- The system should analyse customer complaints and identify recurring issues, trends, and potential root causes. 8. AI Knowledge Base Improvement- The system should analyse unresolved enquiries and recommend updates to the knowledge base/FAQ content. Example: Many agents search for the same topic → suggest adding new FAQ		
4.57	Reporting	Analysis of departments and responsible persons	[Insert Compliance Status]	[Insert System Solution Details]
4.58	Reporting	Case distribution and resolution statistics by dealer/department/PIC	[Insert Compliance Status]	[Insert System Solution Details]
4.59	Reporting: Dealer Escalation	Ranking of first response rate (2-hr response rate), resolution rate and resolution time of each department/dealer	[Insert Compliance Status]	[Insert System Solution Details]
4.60	Reporting	Analysis the Complaint Reopen Rate, CRR by dealers/department/PIC	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.61	Reporting	Case aging from timestamp created	[Insert Compliance Status]	[Insert System Solution Details]
4.62	Reporting	WIP weekly case. Refer to sample report.	[Insert Compliance Status]	[Insert System Solution Details]
4.63	KPIs & NPS	Call Centre KPIs (SLA, agent workload, response times) and Agent NPS rating from Call/WA. Refer to sample report.	[Insert Compliance Status]	[Insert System Solution Details]
4.64	Reporting	Call Centre KPI Reports		
4.65	Reporting	SLA response achievement rate	[Insert Compliance Status]	[Insert System Solution Details]
4.66	Reporting: Phone calls	Abandon rate; calls which customer dropped off while put on hold (in queue).	[Insert Compliance Status]	[Insert System Solution Details]
4.67	Reporting	The number of tasks processed by each agent and the average response time. Refer to sample report.	[Insert Compliance Status]	[Insert System Solution Details]
4.68	Reporting	The average response duration (first response time) and the average case closure time are based on the channel response time. Refer to sample report.	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.69	Reporting	1. Average Call Handling Time (AHT) 2. After Call Work (ACW)- track the time spent by agents on post-call activities, including case updates, documentation, categorisation, and follow-up actions. 3. Resolution Time distribution (e.g.): - Same day - 1–2 days - 3–5 days - 5 days	[Insert Compliance Status]	[Insert System Solution Details]
4.70	Reporting	Ranking of popular complaint types and statistics during peak complaint hours. Refer to sample report.	[Insert Compliance Status]	[Insert System Solution Details]
4.71	Reporting	NPS For Agent	[Insert Compliance Status]	[Insert System Solution Details]
4.72	Reporting	Customer rating of agent performance from Call & WA channel	[Insert Compliance Status]	[Insert System Solution Details]
4.73	Live Dashboard	Provide visibility of agent working days, login/logout records, availability status, and overall activity performance.	[Insert Compliance Status]	[Insert System Solution Details]
4.74	Lifecycle & Exports	Case life cycle map, anomaly warning dashboard, requested tag keyword reports, auto PDF/Excel email dispatch.	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.75	Reporting	Case life cycle tracking	[Insert Compliance Status]	[Insert System Solution Details]
4.76	Dashboard	A map of the time distribution from creation to closing	[Insert Compliance Status]	[Insert System Solution Details]
4.77	Reporting	Trend analysis of special states such as Higher escalation /WIP/Temporary Closed/Closed	[Insert Compliance Status]	[Insert System Solution Details]
4.78	Reporting	Reports need to be exported to PDF, Excel, and automatically sent to management on a regular basis	[Insert Compliance Status]	[Insert System Solution Details]
4.79	Reporting	Configurable " Anomaly Warning Dashboard " to achieve real-time anomaly prompts (such as the explosion of a channel)	[Insert Compliance Status]	[Insert System Solution Details]
4.80	Reporting	System should be able to run report based on request tag key word	[Insert Compliance Status]	[Insert System Solution Details]
4.81	Reporting: General	For all reports, the system should provide real-time and historical reporting with customizable date range selection, allowing users to analyze call centre performance by agent, team, date period, and customer interaction channel.	[Insert Compliance Status]	[Insert System Solution Details]

Req ID	Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
4.82	Reporting: Export	All reports shall be able to export out into CSV, XLS and PDF format	[Insert Compliance Status]	[Insert System Solution Details]
4.83	Account Management	System should support configurable user profile with customizable permissions based on functions and data.	[Insert Compliance Status]	[Insert System Solution Details]
4.84	Data Retention Policy	System must retain all operations data for a minimum period of 7 years.	[Insert Compliance Status]	[Insert System Solution Details]

5.0 PROJECT TIMELINE & IMPLEMENTATION PHASES

Vendor to detail the high-level project implementation timeline.

Phase & Focus Area	Timeline	Key Deliverables & Activities	Sign-Off Milestone
Project Kick Off	[Insert Timeline]	[Insert Deliverables & Activities]	[Insert Target Gate Deliverable]
Discovery & Architecture Blueprint	[Insert Timeline]	[Insert Deliverables & Activities]	[Insert Target Gate Deliverable]
Core Platform & Integration Build	[Insert Timeline]	[Insert Deliverables & Activities]	[Insert Target Gate Deliverable]
AI Engine & Power BI Analytics	[Insert Timeline]	[Insert Deliverables & Activities]	[Insert Target Gate Deliverable]

Phase & Focus Area	Timeline	Key Deliverables & Activities	Sign-Off Milestone
Testing, Training & UAT	[Insert Timeline]	[Insert Deliverables & Activities]	[Insert Target Gate Deliverable]
Data Migration	[Insert Timeline]	[Insert Deliverables & Activities]	[Insert Target Gate Deliverable]
Cutover, Go-Live & Post-Support	[Insert Timeline]	[Insert Deliverables & Activities]	[Insert Target Gate Deliverable]
Project Close Out	[Insert Timeline]	[Insert Deliverables & Activities]	[Insert Target Gate Deliverable]

6.0 PROJECT MANAGEMENT METHODOLOGY, PROGRESS REPORTING & GOVERNANCE

Module	Scope & Key Deliverables	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
6.1 Delivery Methodology			
Delivery Approach	Vendor to indicate the Delivery Methodology that will be applied for this project, e.g., Agile-Waterfall Hybrid Approach.	[Insert Compliance Status]	[Insert System Solution Details]
Scope & Change Management	Indicate the process for Scope & Change Management should this arise during the project.	[Insert Compliance Status]	[Insert System Solution Details]
Quality Assurance & Risk Management	Indicate the QA & Risk Mitigation strategies applied for this project.	[Insert Compliance Status]	[Insert System Solution Details]

Module	Scope & Key Deliverables	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
6.2 Project Governance & Communication Structure			
6.2.1 Project Governance Organization	Propose the project governance organization for this project e.g. project steering committee, project working group, technical team	[Insert Compliance Status]	[Insert System Solution Details]
6.3 Progress Reporting & Transparency Tools			
6.3.1 Project Dashboard / Status Reports	Indicate the reporting method and cadence	[Insert Compliance Status]	[Insert System Solution Details]
6.3.2 Milestone Sign-Off Artifacts	Throughout the course of the project, vendor must provide evidence for critical project deliverable including but not limited to the following: 1. Project Kick Off Deck 2. Business Requirements Document 3. Technical Design Document 4. SIT Report 5. UAT Report 6. Production Deployment Check List 7. System Configuration Document 8. Training Manual 9. System Operation Manual 10. Project Close Document	[Insert Compliance Status]	[Insert System Solution Details]

7.0 LICENSE CONTROL MECHANISM & ENFORCEMENT ARCHITECTURE

Module	Scope & Key Deliverables	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
7.1 License type	Concurrent, floating user, named user, provision for standard and light licences e.g. light for administrator use for viewing report, etc.	[Insert Compliance Status]	[Insert System Solution Details]
7.2 License Encryption & Verification Standards	Cryptographic Key Binding	[Insert Compliance Status]	[Insert System Solution Details]
7.3 Login Control / IAM	Basic Username and Password verification, MFA, etc.	[Insert Compliance Status]	[Insert System Solution Details]
7.4 Verification Mode	Online Validation / Offline Cache	[Insert Compliance Status]	[Insert System Solution Details]
7.5 Session Heartbeat & Concurrency Polling	Polling Protocols & Idle Time-out Rules	[Insert Compliance Status]	[Insert System Solution Details]
7.6 Password Policy	- Allow to save the password on the desktop machine so user does not need to key in each time they login - Prompt to change password every 3 months, support user self-service changing of password	[Insert Compliance Status]	[Insert System Solution Details]
7.7 License provisioning	System should provision for adding of user licenses on individual user and monthly subscription basis		

8.0 AFTERSALE SUPPORT & SERVICE LEVEL AGREEMENT (SLA)

Vendor to propose system maintenance and support that will follow when the warranty period expires

Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
8.1 Support Channels & Maintenance Framework			
8.1.1 Support Organization	Provide the support organization Is support For critical issues, support is required on-site to work closely with the CRM team and call centre to manage workaround.	[Insert Compliance Status]	[Insert System Solution Details]
8.1.2 Helpdesk Access	Access to support across multi-channels: Email, phone, WhatsApp	[Insert Compliance Status]	[Insert System Solution Details]
8.1.3 Support Availability	Support must be contactable following PRO-NET business hours. Mon-Fri 8:00AM – 5:30PM	[Insert Compliance Status]	[Insert System Solution Details]
8.1.4 Support Ticket Management	Support ticketing portal to provide visibility and tracking of cases	[Insert Compliance Status]	[Insert System Solution Details]
8.1.5 System Uptime Guarantee	The cloud platform must maintain a 99.9% uptime baseline, excluding scheduled maintenance.	[Insert Compliance Status]	[Insert System Solution Details]

Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
8.1.6 Scheduled Maintenance	Scheduled maintenance can only be carried out between 00:00 to 04:00 hrs. RSA must be available 24/7 and unaffected by scheduled maintenance.	[Insert Compliance Status]	[Insert System Solution Details]
8.1.7 KB Maintenance	Add, remove, updating the KB as required by business	[Insert Compliance Status]	[Insert System Solution Details]
8.1.8 AI Calibration & Training	Calibration of speech to text transcription and AI responses on language adaptation, sentiment/emotion factor and KB completeness and accuracy, and accuracy of conversation summary	[Insert Compliance Status]	[Insert System Solution Details]
8.1.9 Updating escalation group/list	To Add, remove, update list of dealers, escalation PIC as business requires	[Insert Compliance Status]	[Insert System Solution Details]
8.1.10 Case categorization	To Add, remove, update list for categories as business requires	[Insert Compliance Status]	[Insert System Solution Details]
8.1.11 System Performance Health Check	Proactive System Monitoring, system resources, storage, etc	[Insert Compliance Status]	[Insert System Solution Details]
8.1.12 System Backup and Disaster Recovery Plan:	Detail the backup and DR strategy, frequency, full, incremental	[Insert Compliance Status]	[Insert System Solution Details]

Module	User System Requirement	Compliance Status (Fully / Custom / TP / Non)	Proposed Solution Details
8.1.13 Software Updates	Regular software updates and security patches	[Insert Compliance Status]	[Insert System Solution Details]
8.1.14 System Bug Fixes, Enhancement Change Request	Details the process for change requests	[Insert Compliance Status]	[Insert System Solution Details]
8.1.15 Account Management	To conduct a monthly review of system performance, availability, AI accuracy, KB health status, support SLA performance, system health report, insights for improvement	[Insert Compliance Status]	[Insert System Solution Details]

9.0 SERVICE LEVEL AGREEMENT (SLA)

Support must be available 24/7

Severity Level	Description & Operational Impact	Target Response Time	Target Resolution Time
9.1 Incident Severity Levels & Response / Resolution SLAs		To acknowledge receipt of incident report, and to provide initial assessment and temporary solution	To clarify the root cause and deliver the permanent solution
Critical (P1)	System down, Core function impaired, data loss/unavailable/not loading, no manual workaround Example: login failed, inbound and outbound not working/intermittent, AI faulty and not working as expectation	<30 minutes	<2 hours

Severity Level	Description & Operational Impact	Target Response Time	Target Resolution Time
	(missing disclaimer, wrong information replied, no ticket created)		
Major (P2)	Core Function impaired, no manual workaround is available. Example: agent status incorrect, AI transfer to Live agent failed, escalation not working as expectation, round robin dysfunction, UI distorted but partially legible (key data)	<1 hours	<4 hours
Moderate (P3)	Non-core Function impaired Example: AI response incorrect, file attachment cannot open, cannot generate and download reports, report data is incorrect, UI distorted but partially legible (supplementary data)	<4 hours	<24 hours
Minor (P4)	Minor bug, cosmetic Example: UI distorted but still fully legible, UI Enhancement	<24 hours	<5 days

10.0 PAYMENT MILESTONE

Phase	Milestone / Event	Payment	Key Deliverables
Mobilization	Project Kick Off	15%	Project plan
Discovery & Architecture Blueprint	Requirements Sign off	15%	- Business Requirement Document - Technical Design Document
Development & Test	UAT Sign Off	40%	- SIT Report - UAT Report

Phase	Milestone / Event	Payment	Key Deliverables
Production Deployment	Go-Live	20%	• Production Deployment Checklist • System Configuration Document
End of warranty period	Project Close Out	10%	• Project Completion Certificate • Project Deliverables Snag List / Punch List
